Nablus Municipality launches unit of solar power generation in the wastewater treatment plant

Attended by Nurnberg official delegation, Nablus Municipality inaugurated a unit of solar power generation in the western wastewater treatment plant, which represents a milestone on the transition to renewable energies. The pilot project sponsored by Nurnberg Municipality, and aims to test the possibility of linking electricity cables, a methane and a solar unit in one purification plant. The solar unit will produce 125 kWh, which provides 10-12% of the electric power needed by the treatment plant and will be used to pump up water for irrigating crops. The Energy Authority expressed its willingness to support and invest more in projects in Nablus. Moreover this project is the first step of a technical cooperation between Nablus and Nuremberg.

for irrigating crops. The Energy Authority expressed its willingness to support and invest more in projects in Nablus. Moreover this project is the first step of a technical cooperation between Nablus and Nuremberg.
